In a meeting held with cadres, reserves and officials of the Municipal Assembly of People's Power in Imías, issues such as adaptation to Climate Change, contemplated within the Life Task, were analyzed, which leaves us in better conditions to face the control and supervision that is will address this important issue and will be discussed in the assembly session in July

I will take care of our environment, I will love our environment, we are counting on you to dream and an Imías to ensure. When we think about our future, that of this territory that welcomed Martí in 1895 and left us an exuberant nature as he passed through here, it is worth bearing his words in our memory and to think like this, the will of man is necessary. with his day to day and his environmental education.

The strategies that you plan in each neighborhood and work centers will be good to ensure what we want: prosperity, health, civility, good manners, as Robert Luis Durán Silot, CITMA municipal specialist in this valley, told us. incentive to improve our climate; grow, planting trees, recycling, protecting the waters, vital for life. If

The will of man: love and care for the environment.

we ensure the environment we want, we will achieve health and sustainability in this part of the country. We are convinced that ensuring a better world is possible. Every morning, when the sun wakes you up with its luminous rays and you go to perform your functions, you walk or move in cars, cars and delight your gaze, in the beauty of this place, the universe belongs to you. Let's take care of it.

The will of man: love and care for the environment.
