enter art schools, improve promotional activities through the provincial and national media, greater attention to the literary movement, in addition to give greater impetus to community work with the impact of fans in cultural development.

The space became an opportune moment to reaffirm the support provided by the provincial sector with the marked objective of transforming the constructive image, the work of the institutions in the field of attention to their workers, extensions to neighborhoods mainly of the Turquino Plan; as well as the work designed to raise the knowledge of the cadres and their reservations from the sector itself about their work in an important organism for the Revolution.

This meeting left as a premise, to continue with these spaces for debate that promote imiense cultural development.
